The Norway Case.—The high terms of the Teachers' Institute for a year, under the direct of Judge Emery, the by the mention of this case suggests to us very strongly, that the cause of education would be greatly promoted in Maine by the election of the Judge as the permanent Secretary of the Board of Education to fill the place so honorably held by Mr. Crosby, and now temporarily supplied by Mr. Thurston, whose health, we understand is a very poor one, so much so indeed, that Mr. Thurston accepted the office only until next spring, and then to resign his position to the Secretary of the Board of Education, and inspire the big and big hopes of a man of comprehensive and liberal views. A man thoroughly educated, his heart is in the work for the work sake, and his acceptance of the office would be hailed with the highest pleasure.

The remarks of the Advertiser in reference to the good which the Institute is that county is an accomplished remains to be seen, but the fact that the county is notified to hold its election on the 12th of November. We trust that every teacher in the county who wishes to keep up with the times, and discharge his whole duty in the important station of an educator of the rising generation, will make it a point to be present during the entire session, and reap all the benefits of the entire session, and the Institute will be in the power of the institution to confer.

Home's History of England. Vol. 3. The third volume of Phillips, Sampson and Company's History of England, in uniform volumes with Macaulay's has been received from Mr. David Bugbee, who has the work for sale in this city.

This publication affords a fine opportunity for the people generally to provide themselves, at a low rate, with this standard history, and in which they will find a treasure of excellent reading, a work for frequent reference, a book that may be taken up in profit for a hour at any time by any member of an intelligent family.

New York Indians. Mr. Frost visited these Indians in June last, and found many of them further advanced in civilization than he expected. On the Cattaraugus Reservation there are houses and farms which resemble very much those of the white in the vicinity. There is also a great deal of intelligence and shrewdness among the people which indicates not a little mental activity. They will probably be prepared at no distant day to become citizens of the State of New York.

Crecent Division of the Sons of Temperance. are about making an effort to revive the interest in their meetings for the coming winter, and for this purpose the treasurer of important business, every member is specially invited to be present at the regular meeting to be held at their hall, on Tuesday, at 10 o'clock.

The loco papers stated, some time ago, that every Democrat had been removed from office by Gen. Taylor. It is fair to infer, then, that all the recent removals and such as hereafter occur, are whigs who rise place to other whigs according to the doctrine of rotation in office.

Gen. Guyon, an old soldier, is the last leader of the Hungarian forces who hold out in the open field. His force is not large but he has sworn not to surrender until free agents are granted to the foreign auxiliaries of the Hungarian cause.

The railroad in Cuba appear to be progressing very well. The branch road, to connect with that of Puerto Principe, has just been commenced. That to Baco, D. I. Rio will soon be finished and opened.

A tall rain commenced here on Sunday, and continues up to the time of our going to press on Monday morning, and appears promising for some time to come. This will be just the ticket for our lumbermen, if it continues copiously for a while longer.

The London Times emphatically warns the public against embarking their persons or money in any of the gold mining companies evoked in that city by the recent accounts from San Francisco.

A mass of the private correspondence of Calvin, of the very highest literary and historical value, has been discovered by a gentleman engaged in one of the public colleges of France, and is about to be given to the world.

The New England Washingtonian has in its issue of the 1st of October a long and interesting article on the life of the late President, which is a most valuable contribution to the knowledge of his life.

The second Congressional district is closely contested, but the Democratic candidate is probably elected. In the 5th district, Evans, Whig, is elected by 500 majority.
